Final-year Computer Science student (Università Degli Studi di Firenze) with Erasmus+ exchange experience at Universidad Carlos III de Madrid, specialized in software development and applied AI. Hands-on experience architecting and deploying backend systems and web apps.

EDUCATION

Bachelor Degree

Computer Science

Sept. 2023 – Oct. 2026

Università Degli Studi di Firenze, Italy

- Erasmus+ Exchange Program

Computer Science

Jan. 2026 – July 2026

Universidad Carlos III De Madrid, Spain

High School Diploma

Computer Science and Economics

Sept. 2017 – June 2022

I.I.S.S. Giuseppe Peano, Italy

PROJECTS

Real-Time Kinematic Analysis via Computer Vision - July 2026 🔄

Role: Developer

- Engineered a client-side web app using MediaPipe Pose to track body landmarks in real time during weightlifting.
- Automated joint-angle calculations to detect form deviations and provide immediate visual feedback.

Reader – Backend Architecture - May 2026 🔄

Role: Co-Developer

- Architected and built the Python (FastAPI) backend for an Android reading-tracker app, deploying to Google Firebase.
- Integrated asynchronous Firestore access, in-memory TTL caching, APScheduler-based reminders, and hardened Google Books API calls with exponential backoff retry logic to handle rate limits.
- Implemented authentication for secure access to user reading data.

Reactor Power Control via MDP - May 2026 🔄

Role: Co-Developer

- Built a Python reactor power control simulation using pymdptoolbox, modeling states/actions/transition probabilities with custom control modules and demand generators.

Expression Evaluator in RISC-V - June 2025 🔄

Role: Developer

- Developed a full expression evaluator in RISC-V assembly, handling recursive-descent parsing, operator precedence, and manual register-level memory management without high-level language abstractions.

EXPERIENCE

IT Specialist

Taxileader

Sept. 2022 – Sept. 2023

Sliema, Malta

- Managed and maintained multiple company websites on WordPress and Joomla CMS platforms, including hosting configuration and uptime monitoring.
- Provided technical support to the team, diagnosing and resolving issues to minimize downtime.
- Designed and deployed new CMS-based websites from initial design through launch.
- Facilitated client and internal communication in English and Spanish.

SKILLS

Languages & Tools: Java, Python, C, C++, Assembly, JavaScript, HTML, MySQL, LaTeX, React, CSS, WordPress, Joomla, Keras, TensorFlow, NumPy, Pandas

Software Engineering: Git/GitHub, REST APIs, Google Cloud Platform, Firebase

Languages: Italian (Native), English (C1), Spanish (B2)
